HAVEN COMMAND LLC

INVESTOR OVERVIEW · JUNE 2026

Five Ways to Back Haven Command

A portfolio of live and nearly-live software products in chess training, AI tools, game development, and professional services automation. Structured as a promissory note — your principal back, plus interest, on a defined timeline.

$5,000 | $10,000 | $25,000 | $50,000 | $100,000

CONFIDENTIAL

Who We Are and Where We Stand

Haven Command LLC is a California software company building a portfolio of revenue-generating digital products across chess training, AI professional tools, game development, and business automation. We are founder-owned, fully incorporated, and have built everything to date at essentially zero operating cost.

✓ CALIFORNIA LLC — INCORPORATED

✓ EIN ISSUED BY IRS

✓ OPERATING AGREEMENT EXECUTED

✓ MERCURY BUSINESS BANK ACCOUNT OPEN

✓ D4CHESS.CLUB — LIVE & ACCEPTING SUBSCRIPTIONS

● THERASCRIBE — BUILT, FINAL QA

● SCRIPTFORGE AI — 70% COMPLETE

○ COGNITION (GAME) — 40% COMPLETE

> *"We are not asking for money to start. The products are built. D4Chess is live today. We are asking for capital to let people know it exists — and to accelerate what is already working."*

The Portfolio

Six products at various stages of completion. Each targets a distinct customer segment and revenue model.

Product	Market	Pricing	Status	GitHub Commits
D4Chess.club	Chess training (600M players)	$7–$15/mo	LIVE	**194**
TheraScribe	Therapist documentation (~180K LTs)	$29–$49/mo	BUILT / QA	**9**
ScriptForge AI	Screenwriters & novelists	$12–$29/mo	70% COMPLETE	**204**
TrustLoop AI	SMB scheduling & CRM	$49–$149/mo	45% COMPLETE	**40**

Product	Market	Pricing	Status	GitHub Commits
HowGamersGame	Casual browser gaming	Coin economy	BETA	**4**
Cognition	Steam / PC gaming (~$5.5B indie market)	$14.99–$24.99	IN DEVELOPMENT	**500+ files**

The Bottleneck Is Not the Product

Haven Command runs on approximately $50/month in infrastructure. Everything built to date — D4Chess, TheraScribe, ScriptForge, the brand, the legal entity, 560+ commits of production code — was built by one person at near-zero cost using modern AI development tools. The products work. The problem is reach.

1. **Paid advertising — the single highest-leverage use of capital right now**
   D4Chess launched this month into a market of 600 million players. The top two platforms (Chess.com, Lichess) have marketing budgets in the millions. We don't need to outspend them — we need to reach 0.01% of their audience with a targeted, specific message. Reddit's r/chess has 800,000 members. A $1,200 campaign into that audience costs less than one month of a developer's salary and can return that in 90 days of subscription revenue.

2. **Cyber liability insurance — required before TheraScribe sees real users**
   TheraScribe handles licensed therapists' session content — protected health information by definition. Professional liability and cyber/media insurance are not optional once real patients' data is involved. This is a one-time compliance gate. Once cleared, the product can operate indefinitely with no additional requirement.

3. **California franchise tax — $800, mandatory, due September 15, 2026**
   California LLCs pay $800 per year regardless of revenue. This is not negotiable and not deferrable. Missing it triggers penalties and potential administrative dissolution.

4. **IP protection — trademark and copyright registration**
   The Haven Command name and custom typeface (haven.ttf) are unregistered. Federal registration costs ~$315–$415 and unlocks statutory damages up to $150,000 per infringement. This is cheap insurance against a competitor copying the brand once we have market presence.

5. **Operational runway — decisions made on merit, not cash pressure**
   A meaningful cash buffer means we can respond to a press opportunity, a partnership inquiry, or a channel that is working — without waiting for the next subscription cycle to close.

> ***For every $38 spent on paid advertising, the customer acquired is worth $288 in lifetime revenue. That's a 7.6× return on ad spend — with CAC payback in under 2 months. The economics work. The constraint is how many people know we exist.***

The Five Investment Tiers

All five tiers are governed by the same Deferred Repayment Agreement (provided separately). Each is a promissory note — a loan, not equity. You receive your principal back plus 4% simple annual interest. Payments are deferred until the Company is cash flow positive for two consecutive months, with a hard 5-year maturity date as your backstop.

$5,000

Tier 1 — Cover compliance and get D4Chess to market

Est. trigger: ~18 months · Returns ~$5,218

D4Chess paid advertising — Reddit, Facebook, Google (60 days) Goal: 500+ free signups, 25–40 paying subscribers	**$1,200**
Business insurance — General liability + cyber/media liability (12 months) Required before TheraScribe onboards real users	**$1,200**
California franchise tax — mandatory annual fee, due Sep 15, 2026	**$800**
IP registration — Haven Command trademark + haven.ttf copyright	**$400**
Infrastructure buffer — 10+ months of hosting costs covered	**$500**
Reserve — scale a working ad, absorb unexpected costs	**$900**
Total	**$5,000**

WHAT IT MEANS FOR THE COMPANY

D4Chess launches with a real campaign instead of relying on organic word-of-mouth alone. Compliance baseline (insurance, tax, IP) is cleared once and for all, removing the three biggest administrative risks.

WHAT IT MEANS FOR THE INVESTOR

$5,000 in → $5,218 out. Simple interest at 4%/year from funding date. Once triggered, fixed monthly payment of ~$217 for 24 months. Hard maturity: full balance due within 5 years.

shanefoster@havencommand.com

$10,000

Tier 2 — Launch D4Chess strong and bring TheraScribe to market simultaneously

Est. trigger: ~12 months · Returns ~$10,488

D4Chess paid advertising — 90-day campaign, multiple channels 5× Tier 1 budget. Tests multiple ad creatives to find what converts best, then scales.	**$3,000**
TheraScribe launch campaign — therapist directories, NASW, CE platforms 25–30 paying therapists at $39/mo generates more MRR than 100 D4Chess subscribers	**$1,500**
Business insurance (same as Tier 1)	**$1,200**
California franchise tax	**$800**
IP registration	**$400**
Contractor sprint — one focused dev engagement (mobile polish, onboarding UX)	**$1,200**
Infrastructure + emergency reserve	**$1,900**
Total	**$10,000**

WHAT IT MEANS FOR THE COMPANY

Two revenue products launch campaigns simultaneously. They target completely different customers, so ad dollars don't compete. The contractor sprint closes the gap between "it works" and "it feels premium."

WHAT IT MEANS FOR THE INVESTOR

$10,000 in → ~$10,488 out. Payments begin ~6 months sooner than Tier 1 because two products means two chances to hit the profitability trigger. Fixed monthly payment of ~$436 for 24 months.

$25,000

Tier 3 — Real runway across three products with development support

Est. trigger: ~9 months · Returns ~$25,825

D4Chess advertising — sustained 6-month paid campaign First 60 days: test creatives. Months 3–6: scale winners. Goal: 300–500 paying subscribers.	**$6,000**
TheraScribe advertising — professional directory & CE platform targeting	**$3,500**
Contract development — 2 focused sprints covering 3 products D4Chess mobile polish · TheraScribe onboarding · ScriptForge AI launch prep	**$4,000**
Cognition game assets — 3D assets, sound design, shaders (Steam-quality)	**$2,000**
Business insurance + franchise tax + IP registration	**$2,400**
Legal review of investor documents (attorney, one-time)	**$2,000**
Operating reserve — 14+ months of infrastructure fully covered	**$5,100**
Total	**$25,000**

WHAT IT MEANS FOR THE COMPANY

Three products in active campaigns. Contractor support means faster feature delivery. Legal review protects both parties. Operating reserve eliminates cash pressure entirely for over a year.

WHAT IT MEANS FOR THE INVESTOR

$25,000 in → ~$25,825 out. Three revenue products reaching the market simultaneously compresses the profitability trigger to ~9 months. Monthly payment ~$1,076 for 24 months once triggered.

shanefoster@havencommand.com

$50,000

Tier 4 — Launch all revenue products simultaneously with dedicated development support

Est. trigger: ~5 months · Returns ~$51,500

D4Chess + TheraScribe sustained ad campaigns (6 months) Full-funnel: Reddit, Facebook, Google, YouTube, professional directories — all running in parallel	**$20,000**
ScriptForge AI launch campaign — writer forums, NaNoWriMo partnerships, YouTube ads	**$8,000**
Contract developer — 3 months part-time (feature acceleration, all products)	**$6,000**
UI/UX designer — visual polish across all customer-facing products	**$3,000**
Cognition — full asset pipeline + Steam submission fee	**$2,000**
Insurance + franchise tax + IP registration	**$2,000**
Legal + accounting professional setup	**$3,500**
12-month infrastructure + reserve	**$5,500**
Total	**$50,000**

WHAT IT MEANS FOR THE COMPANY

Three revenue products in simultaneous paid campaigns creates a compounding effect — a therapist using TheraScribe may also play chess. Cross-product discovery reduces effective CAC across the portfolio. With a contracted developer, product improvements ship 2–3× faster.

WHAT IT MEANS FOR THE INVESTOR

$50,000 in → ~$51,500 out. The profitability trigger is expected within 5 months because three products running concurrently dramatically increases the surface area for revenue. Monthly payment ~$2,146 for 24 months. Projected Year 1 revenue: ~$359,000.

$100,000

Tier 5 — Full-scale company launch across all products in 12 months

Est. trigger: ~3 months · Returns ~$103,300

Full multi-channel ad campaign — all products, 12 months Google, Reddit, Facebook, YouTube, LinkedIn (for TrustLoop B2B), therapist associations	**$40,000**
Full-time contract developer — 6 months Dedicated engineering support: new features, mobile apps, platform improvements	**$18,000**
UI/UX designer + content creator	**$10,000**
Cognition — full commercial asset pipeline + sound design + Steam publishing	**$8,000**
ScriptForge AI + TrustLoop AI focused development sprint	**$5,000**
Legal + accounting + professional structure setup	**$3,000**
Insurance — all products fully covered	**$2,500**
Operations, reserve, and contingency	**$13,500**
Total	**$100,000**

WHAT IT MEANS FOR THE COMPANY

Haven Command stops being a solo founder with a side budget and becomes a functioning company. A 12-month sustained campaign builds brand recognition — not just launch spikes. With a full-time dev and designer, all five products are live and polished by month 6. This is the tier where the company is likely self-sustaining before year 2.

WHAT IT MEANS FOR THE INVESTOR

$100,000 in → ~$103,300 out. The profitability trigger fires in approximately 3 months because the company goes from zero marketing to a comprehensive 12-month campaign with dedicated staff. Monthly payment ~$4,304 for 24 months. Projected Year 1 revenue: ~$716,000.

shanefoster@havencommand.com

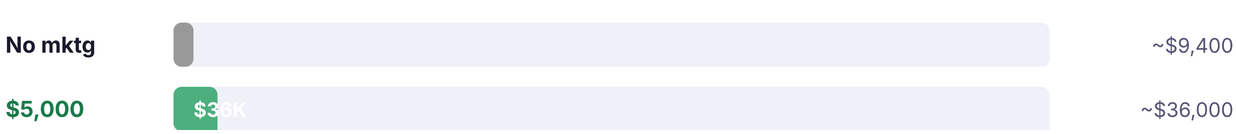
Side-by-Side: All Five Tiers

LINE ITEM	$5K	$10K	$25K	$50K
D4Chess ads	$1,200	$3,000	$6,000	$20,000*
TheraScribe launch	—	$1,500	$3,500	incl.
ScriptForge AI launch	—	—	—	$8,000
Insurance	$1,200	$1,200	$1,200	$1,200
CA Franchise Tax	$800	$800	$800	$800
IP Registration	$400	$400	$400	$400
Contractor / Dev support	—	$1,200	$4,000	$9,000
Cognition assets	—	—	$2,000	$2,000
Legal + accounting	—	—	$2,000	$3,500
Reserve + infrastructure	$1,400	$1,900	$5,100	$5,500
TOTAL	**$5,000**	**$10,000**	**$25,000**	**$50,000**
Year 1 projected revenue	**~$36K**	**~$76K**	**~$166K**	**~$359K**
Est. months to repayment trigger	**~18 mo**	**~12 mo**	**~9 mo**	**~5 mo**
Total returned to investor	**~$5,218**	**~$10,488**	**~$25,825**	**~$51,500**
Interest rate	4% simple annual, accruing from funding date · Hard 5-year maturity · Fixed 24-r schedule			

* Tiers 4 & 5 combine D4Chess, TheraScribe, and ScriptForge AI in a single blended campaign budget.

Year 1 Revenue Projection by Tier

Based on blended $18/user/month avg revenue, $38 CAC, 5% monthly churn. Conservative estimates.



$10,000	$76K	~$76,000
$25,000	$166K	~$166,000
$50,000	$359K	~$359,000
$100,000	$716K · 12-month projection	~$716,000

Customer Economics — Why the Numbers Work

AVG REVENUE / USER / MO	AVG CUSTOMER LIFETIME	LIFETIME VALUE (LTV)
$18	**16 mo**	**$288**
Blended across all products	Conservative estimate	$18 × 16 months

COST TO ACQUIRE (CAC)	LTV : CAC RATIO	CAC PAYBACK PERIOD
$38	**7.6×**	**2.1 mo**
Paid social, optimized	Healthy benchmark is 3×	Fast payback = high confidence

Why This Is a Reasonable Bet

Most investment pitches ask for money to build something. This one asks for money to scale something already built. D4Chess is live. TheraScribe is built. ScriptForge AI is 70% complete. The code exists, the business is legally structured, and the first product is already accepting payments.

WHAT'S ALREADY DONE

✓ California LLC incorporated
✓ EIN issued, operating agreement signed
✓ Mercury bank account open
✓ Stripe live mode active
✓ D4Chess live and accepting subscriptions
✓ TheraScribe fully built
✓ 560+ commits of production code
✓ All expenses documented, books maintained

WHAT THIS INVESTMENT UNLOCKS

→ Paid campaigns reaching 30K–800K+ people
→ Compliance baseline cleared permanently
→ TheraScribe live to real therapist clients
→ Faster product iteration with dev support
→ Cognition on Steam (Tier 3+)
→ All products live simultaneously (Tier 4+)
→ Self-sustaining company by Year 2 (Tier 5)
→ Investor repaid with interest on clear timeline

> ***"The risk here is market adoption — not execution capability. The products are built. The founder has demonstrated he can ship. The only open question is how fast the market responds."***

Next Steps

1. **Review this document at your own pace**
   There is no deadline and no pressure. Take as much time as you need.

2. **Review the Deferred Repayment Agreement separately**
   Independent legal or financial advice is encouraged, especially for larger amounts. The agreement is straightforward but professional review is worth doing.

3. **Tell Shane which tier feels right — or ask questions**

   No obligation in either direction. A partial amount is also acceptable — any of these tiers can be adjusted by mutual agreement.

4. **Sign the Deferred Repayment Agreement**

   Both parties sign. Investment amount and effective date are filled in. No equity changes hands.

5. **Funds transferred to Haven Command LLC Mercury account**

   Deployment begins within 30 days of funding. You receive quarterly reports from that point forward.

IMPORTANT DISCLOSURES

- Haven Command LLC is an early-stage, pre-profit company. All revenue projections are estimates, not guarantees.
- This is not a public securities offering. This is a private, friends-and-family promissory note between known parties.
- All investment terms are governed solely by the signed Deferred Repayment Agreement. This document is explanatory only.
- Shane Foster is not a licensed financial advisor. Independent review is recommended before signing.
- California and federal securities exemptions likely apply. For amounts above $10,000, consult qualified legal counsel.
- LTV and CAC figures are industry-based estimates. Actual results depend on market conditions, ad performance, and product-market fit.
